

The Winola Lake Mobile Caregiver Platform Wall Mount

Advanced Design For Healthcare Settings

To better serve the computing needs of clinicians in a variety of healthcare settings, Winola Lake designed the Mobile Caregiver Platform Wall Mount, a full-featured wall mount with superior design and build quality.

The Mobile Caregiver Platform Wall Mount offers a more compact solution than traditional wall mounted computer options as well as innovative features like an exterior that doubles as a dry-erase white board and a dual bay design to simplify and secure the work area.

Built for Form and Function

While wall mounted computers have become a standard choice for hospitals looking to provide convenient computer access to staff in constrained areas, they have typically been lacking in features that better fit the daily workflows of clinicians.

As experts in healthcare computing solutions, Winola Lake has created the Mobile Caregiver Platform Wall Mount to be the first computer enclosure that brings cutting-edge design and materials, increased security, and healthcare-centric features to any location within the hospital setting.

Winola Lake brings together EMR systems expertise, wireless and mobility capabilities and superior products like the Mobile Caregiver Platform Wall Mount to create the ideal solutions for your hospital, all from a single provider.

The **Winola Lake Mobile Caregiver Platform Wall Mount** serves the computing needs of clinicians in a variety of healthcare settings

Why the Mobile Caregiver Platform Wall Mount?

- **Workflow:** Designed by clinicians, the Mobile Caregiver Platform Wall Mount creates a secure and convenient area to record patient data and access technology for electronic bedside medication verification.
- **Design:** The exterior doubles as a white board for displaying nurse information, patient care plan and quick notes for the patient
- **Size:** The Mobile Caregiver Platform Wall Mount is significantly lighter and smaller than a conventional wall mount unit.
- **Style:** With sleek rounded corners and a modern color scheme, the Mobile Caregiver Platform Wall Mount blends into the hospital décor.

Mobile Caregiver Platform Wall Mount Specs & Features

- Size: 30.5”H x 27.2”W x 4”D
- Weight: Less than 50 pounds
- Construction: Heavy gauge steel
- Handle: Anodized aluminum
- Finish: specialty gloss paint that doubles as a white board
- Color: White with light gray accents
- Optional elegant wood veneer
- Electronic keypad lock
- Scanner Brackets: Two barcode scanner brackets that accommodate specific needs
- Keyboard and mouse tray with a palm rest for wrist support
- Tech Bay: A separately locked area for secure PC and power supply storage
- Linear Dampeners: allow the keyboard and mouse tray to close smoothly
- Monitor: Fits up to a 19” thin profile monitor
- Side Ventilation: Slots can also be used for simple power switch access
- Multi-purpose Cubby: A convenient cubby mounted on the inside of a unit made of Santoprene, a medical grade material that can be easily removed for cleaning
- Superior Cable Management: Routing ports keeps the work area free of cable clutter
- Warranty: 5 years

The optional wood veneer finish gives the Mobile Caregiver Platform Wall Mount a warmer feel to match the hospitals interior design.

The New Era of Wall Mount

The Mobile Caregiver Platform Wall Mount has an array of features that transform the experience for caregivers and impress anyone who sees it. It has been designed by clinicians to be easy to use, compact to fit a wider variety of usages and innovative in the way it looks, feels and operates.

The Mobile Caregiver Platform Wall Mount features a wrap around outer shell that creates a soft and elegant form, while making it strong and compact. To minimize clutter and put the user closer to their technology, it is divided into two sections: a lower bay for the technology components and an upper bay for a monitor, keyboard, mouse and barcode scanner.

The unit is significantly smaller than a typical wall mounted unit. Because of this slim design, the Mobile Caregiver Platform Wall Mount only accepts thin profile monitors and thin client PCs. The overall weight has been minimized to less than 50 pounds, making installation quick and easy.

The Winola Lake Mobile Caregiver Platform

The Winola Lake Mobile Caregiver Platform is designed by clinicians to provide the ideal solutions to improve workflows and enable better patient care.

Through the Mobile Caregiver Platform Workstation, Wall Mount and Mobile Clinical Assistant (MCA), Winola Lake empowers your hospital to perform better every day.
