Winola Lake to Provide IT Consulting and Services to Atrium Health and Senior Living's 44 Locations

PIPERSVILLE, PA – February 20, 2018 – Winola Health IT, a leading provider of IT and point of care medical devices to healthcare organizations and hospitals, has been chosen by Atrium Health and Senior Living to provide and streamline all of their IT resources. With over 40 locations and 3,400 residents in New Jersey, Wisconsin, and Michigan, Atrium Health and Senior Living has raised the standards on what senior care and living should look like. Winola's team of veteran IT staff have been called upon to augment Atrium's IT department, through the improvement and maintenance of computer imaging, data centers, and user on boarding. Winola will also be responsible for the brake fix of mobile computers and laptops, ultimately increasing workflow and efficiency for the end user.

"When a healthcare organization needs assistance supporting their staff, their end users, and their facilities Winola Health IT can step in as the experts of point of care technology and the IT support necessary to help ensure seamless IT service and uptime for the end users," says Rick Hodge, President and CEO. "We believe that with our IT consulting and support we are able to assist Atrium Health and Senior Living in providing all around more efficient and streamlined services to both its staff and its residents."

"Winola Lake Health IT is a strategic business partner that provides Atrium Health & Senior Living cost effective IT solutions," says William Hnatiuk, VP of Strategic Procurement at Atrium. "Access to information is critical for positive resident and patient outcomes and Winola Lake Health IT resolves issues in a timely manner, which helps Atrium Health & Senior Living achieve those positive outcomes."

Winola Lake Health IT services include Mobility Medic Cart Services, Helpdesk, IT Support, Integration, Preventative Maintenance, and Installation.

About Winola Lake Health IT
